

CAD Designer

Mountain Consulting, Inc. is a growing construction company in the Tri-State area and we are looking for talented people to join our team. We are seeking an experienced CAD Designer to assist in our continued growth. Mountain Consulting, Inc. is seeking motivated candidates for civil design projects performed for a variety of public agencies and private clients. Work will be performed under the guidance of an experienced project engineer and will include collaboration with other designers and engineers. The successful candidate is expected to perform engineering tasks in the civil engineering field through application of relevant design criteria and standards, code requirements, and approval processes. If you're dedicated and ambitious, Mountain Consulting Inc. is an excellent place to grow your career.

Responsibilities for CAD Designer

- Construction plan production that primarily focuses on grading, earthwork, stormwater management, drainage, sanitary sewer, water distribution, entrance and ADA compliance for site development projects
- Assisting in the design of erosion and sediment control plans
- Interpret and apply local, state, and federal code requirements to designs
- Collaborate with team members to develop and adhere to submission schedules
- Pursue ongoing education in the field

Qualifications/Required Attributes

- Associate Degree Preferred
- 2+ years of relevant experience
- Experience in daily use of Microsoft Office Suite and AutoCAD
- Minimum 2 years working in a professional environment
- Strong organizational skills
- Excellent attention to detail
- An abundance of patience to see completed projects to the end
